**Cubic yard capacity is based on uniform level load to top of sides. Hoist Capacity is based on water level non-diminishing load, as the hoist must raise both the body and the commodities. Check the commodity material weights in the NTEA Truck Equipment Handbook to eliminate overloading of the hoist and the GVWR and GAWR of the chassis. COMMITMENT TO CORROSION RESISTANCE

Corrosion won't be a concern when you buy quality Knapheide products. To give you the best corrosion protection, we utilize a state-of-the-art, custom-designed, 12-step, SST cathodic electrodeposition finishing system, called "E-Coat."

It bonds prime paint to steel by an electroplating process to give you a superior coat of primer, resulting in better corrosion protection compared to spraying methods.

This system allows us to create products with the highest level of corrosion resistance available.
